# City of Palo Alto 

Sales Tax Digest Summary
Collections through December 2022
Sales July through September 2022 (2022Q3)

## California Overview

For the year ending in third quarter of 2022, cash receipts increased $13.6 \%$ statewide, $11.9 \%$ in Northern California. However, when adjusted for non-period related payments, the overall economic sales tax activity for the year ending in third quarter of 2022 increased by $9.9 \%$ statewide, and down $1.4 \%$ in Northern California.

## City of Palo Alto

For the year ending in the third quarter of 2022, sales tax cash receipts for the city increased by 17.9\% from the prior year. However, when adjusted for non-period related payments, the overall economic sales tax activity in Palo Alto for the year ending in third quarter of 2022 increased by $18.0 \%$.

On a quarterly basis, sales tax cash receipts increased by $28.3 \%$ from Quarter 3 of 2021 to Quarter 3 of 2022. However, this increase includes late payment anomalies related to a state sales tax extension program. The period's cash receipts include tax from business activity during the period, payments for prior periods and other cash adjustments. When adjusted for non-period related payments, the overall economic quarter over quarter sales tax activity (Q3 2021 to Q3 2022) in Palo Alto increased by 10.3\%.

A large, one-time audit decision of $-\$ 612,000$ negatively impacted the city's cash receipts this quarter. Without the correction, sales tax cash receipts would have increased by approximately $12.4 \%$ from Quarter 2 of 2021 to Quarter 2 of 2022. Approximately $3.8 \%$ of that adjusted $12.4 \%$ Q2 of 2022 over Q2 of 2021 increase might be attributed to inflation, based on increases in the Consumer Price Index, (CPIU). Very little of Palo Alto's adjusted $12.4 \%$ increase might be attributed to increased economic activity, based on changes in US Real GDP. Roughly $1.7 \%$ is attributable to a decrease in payments from prior periods, due to Palo Alto taxpayers getting caught up with payments. The remaining roughly $6.9 \%$ is a combination of recovery and other factors (consumers, businesses and organizations getting back to PrePandemic trends along with non-pandemic related business performance changes). Note that some of these factors are based on broad based data and thus, these growth factors should be treated as rough guidelines for economic activity changes this quarter.

## Regional Overview

The first chart on page two shows adjusted economic benchmark year amounts, which means that it shows a full calendar year from the third quarter of 2021 through third quarter of 2022 compared to third quarter of 2020 through third quarter of 2021 (benchmark years are rolling annual comparisons through the current quarter). The decrease is different between the state and Palo Alto because the sales tax from businesses in Palo Alto were more impacted than those statewide.
