#  PETS IN NEED FOUNDED 1965 

PaloAltoCityCouncil Meeting<br>March 27, 2023

## Mission

Our mission is to provide animals with loving care and lasting homes, to partner with communities striving to do the same, and to advance our no-kill legacy

## Values

Respectand Compassion Leadership
Community Partnership Integrity

## Pets In Need is

 invested in the animals, people, and families of Palo Alto, Los Altos, and Los Altos Hills

## Leadership for Partnership

- New leadership focused on community service
- Uncompromising quality of care and services
- Philosophy of Equity and Access to Care
- Education and outreach no-cost services

## Fiscal Responsibility

## Comparable Analysis

- Performed a comparable analysis with Peninsula Humane Society's fees to the municipalities they serve
- Broke fees down on a per capita basis, to analyze what PHS charges for its 600K residents
- Compared what Pets In Need is requesting for the approximately 100K residents it serves
- New proposed management fee of $\$ 1.37 \mathrm{M}$ is aligned with what PHS charges its municipalities for their current contract going from 2022-2026.

## Fiscal Responsibility

## Budget

- Our detailed budget is based on current actual costs and revenues
- Reflects the realities of recruitment and retention of workers in this geographic area, with highly specialized veterinary skills, in 2023.
- Reflects increased operating costs due to inflation in direct expenses such as animal food, medicine, and veterinary supplies; and indirect expenses such as utilities, insurance, etc.

## Fiscal Responsibility

## Budget

What financial investment is required to deliver high quality care and service?

- We believe, and our budget reflects, that this requires 12.3 FTE (full-time equivalent) staff, in veterinary medicine, animal care, adoptions, fostering, and community programs/outreach.
- We are highly confident that this level of staffing is required to be safe and successful fulfilling our duty of care.

## Trap, Neuter, and Release (TNR)

TNR has been shown to be the most effective way to reduce/eliminate feral cat populations. More than twenty years of active TNR programs across the country, provide us with substantial research that demonstrates TNR's effectiveness.

We realize that this is a complex issue with many facets to consider. We look forward to working together with you to develop an empirically-validated, science-based approach that is humane and mutually beneficial for all those affected.

Please refer to your packet of materials for research and information about TNR, for further discussion.

## Testimonials

## Bella

Adopted this beautiful senior, Bella. I was so impressed. The facilities were clean. I'm surprised at how much care they give -- they felt she needed a teeth cleaning, so they scheduled and paid for one even though we adopted her before the cleaning. Great place to adopt a dog!

## Simba

I've had amazing experiences with Pets In Need! Most recently I adopted a very sweet kitty with the help of the staff who immediately responded to my inquiry, and thoroughly answered all my many questions and concerns! A year ago, I also fostered a kitten from their foster program and was impressed at how professional, knowledgeable, and attentive the staff was. I am truly appreciative of Pets In Need and can only say great things about my experiences.

Teaching Respect, Sharing the Love
